SENIOR INTERNATIONAL PROJECT MANAGER

Overview
SIPM is a fast moving and engaging seminar, focusing on a pragmatic approach and applying a series of processes that are regarded as first-class practices within project management. This course seeks to equip the participants with a clear method to manage projects, with practical tools and techniques designed to make the classic project tasks easy to handle. During the seminar, participants will undertake fifteen exercises in small groups given them the opportunities to apply the theory blocks and reinforce the learning.

Who Should Attend?
Project managers wishing to formalize their existing knowledge
» Project managers moving into an international environment
» Anyone who has to manage an international project or initiative as part of their role
» Team leaders working in an international project environment
» Team members looking to develop their awareness of international project management
» Sponsors of projects, who would like to learn more about how international projects are managed
